

Daisy Chains and Caterpillars

Before the lawn gets cut, spend some time outdoors and see if you can
Make some nice patterns with daisies

What you need

Daisies

Fairly long thumbnails

What to do (daisy chain)

- Pick a good patch where there are lots of daisies
- Pick a few with long stalks
- Split the stalk with your thumbnail about halfway down
- Thread another daisy through and then split that daisy stalk
- Keep going until you have made a bracelet, crown or necklace

What to do (caterpillar)

- Find a daisy with a long, strong stalk (this will be the spine of the caterpillar)
- Pick some more daisies and pull off their stalks
- Make a hole in the top of the flower (the yellow head) and push it through the spine. Repeat this until the stalk is covered
